PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference IGT1P408WO	FOR FURTHER ACTION	See item 4 below		
International application No. PCT/US2008/073599	International filing date (day/month/year) 19 August 2008 (19.08.2008)	Priority date (day/month/year) 23 August 2007 (23.08.2007)		
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237				
Applicant IGT				

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 <i>bis.</i> 1(a).				
2.	This REPORT consists of a total of 7 sheets, including this cover sheet.				
	In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a reference to the international preliminary report on patentability (Chapter I) instead.				
3.	This report contains indications i	relating to the following items:			
	Box No. I	Basis of the report			
	Box No. II	Priority			
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability			
	Box No. IV	Lack of unity of invention			
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement			
	Box No. VI	Certain documents cited			
	Box No. VII	Certain defects in the international application			
	Box No. VIII	Certain observations on the international application			
4.		mmunicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but makes an express request under Article 23(2), before the expiration of 30 months from the priority			

Date of issuance of this report 24 February 2010 (24.02.2010)

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US2008/073599

	Box	c No	o. I Basis of the opinion			
1.	Wit	h re	gard to the language, this opinion has been established on the basis of:			
	\boxtimes	the	international application in the language in which it was filed			
		a t pu	ranslation of the international application into , which is the language of a translation furnished for the rposes of international search (Rules 12.3(a) and 23.1 (b)).			
2.		Th by	is opinion has been established taking into account the rectification of an obvious mistake authorized or notified to this Authority under Rule 91 (Rule 43bis.1(a))			
3.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:					
	a. t	уре	of material:			
			a sequence listing			
	1		table(s) related to the sequence listing			
	b. format of material:					
			on paper			
			in electronic form			
	c. t	ime	of filing/furnishing:			
			contained in the international application as filed.			
			filed together with the international application in electronic form.			
			furnished subsequently to this Authority for the purposes of search.			
4.		ha co	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto s been filed or furnished, the required statements that the information in the subsequent or additional pies is identical to that in the application as filed or does not go beyond the application as filed, as propriate, were furnished.			
5.	Add	ditio	nal comments:			

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US2008/073599

Box No. V Reasoned statement under Rule 43*bis*.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

2. Citations and explanations

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1). Prior Art

Reference is made to the following documents:

D1: US 2006/258427 A1 (ROWE RICHARD E [US] ET AL) 16 November 2006

D2: BAZAKOS M E ET AL: "Fast access control technology solutions (FACTS)" PROCEEDINGS. IEEE CONFERENCE ON ADVANCED VIDEO AND SIGNAL BASED SURVEILLANCE, 2005. COMO, ITALY SEPT. 15-16, 2005, PISCATAWAY, NJ, USA,IEEE, 15 September 2005 (2005-09-15), pages 312-317, XP010881194 ISBN: 978-0-7803-9385-1

D3: DOWDALL-I PAVLIDIS-G BEBIS J: "A face detection method based on multi-band feature extraction in the near-IR spectrum" 14 December 2001 (2001-12-14), PROCEEDINGS IEEE WORKSHOP ON COMPUTER VISION BEYOND THE VISIBLESPECTRUM: METHODS AND APPLICATIONS, XX, XX, XP002369556

2). Clarity - Multiple independent claims

The multiplicity of definitions of the invention given in independent claims **1,20** is contrary to the requirements of Article 6 PCT. For the sake of clarity, the present application may contain more than one independent claim in the same category only if the subject-matter of the application involves (a) a plurality of inter-related products (such as a plug and a socket), (b) different uses of a product, or (c) alternative solutions to a particular problem which cannot be covered by a single claim. None of these apply in the present case.

Moreover, the claim set should be formulated concisely. Further, a diversity of wording for defining one and the same invention should be avoided in order not to render the claims inconsistent with each other and thus unclear.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

PCT/US2008/073599

Consequently, in the present case, it is appropriate to use only one independent claim per category.

3). Novelty

D1 proposes a system meant to track individual within the premises of casinos. The system of D1 is based on cameras connected to a distributed computer system as shown in Figures 2 and 3, as well as in claim 1.

Not only is the technical skeleton underlying the subject matter of claim 1 not novel, it also clearly appears that the ways it is programmed (unspecific rule set of events leading to an undefined categorization of patrons in a database) is fully anticipated by the teaching of D1.

Therefore claim 1 lacks novelty under Article 33(2) PCT.

4). Inventive step

Having regards to the present application in toto and bearing in mind the teaching of D1, it is not apparent what technical contribution to the state of technology could be acknowledged nor is it possible to see what surprising technical effect has to be expected therefrom. Thus, no inventive step can be acknowledged under Article 33(3) PCT.

5). Independent method claim 31

Claim 31 is based on features corresponding to those of claim 1 and therefore calls *mutatis mutandis* for the same objections.

6). Dependent claims

The supplementary features of the dependent claims show programming preferences to be implemented according to the circumstances. It has to be noted that those features are merely defined by means of broad functional terms letting open any possible interpretation as to their concrete implementation by the skilled person. Nonetheless, those options are also covered by the passages of D1 cited

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/US2008/073599

in the Search Report and above. It is not apparent how -should they be combined with an independent claim- they would contribute to the resolution of a technical problem so that they are at least not inventive.
